# Unique gifts for effective brand recognition

Aligned with the growing need to support recycling and reutilization, we continuously re-examine the way we approach our product selection, materials used and services. Within the different product categories, you can find useful products for use in everyday life. A branded item used on a daily basis will enhance your brand presence. Discover this More Than Gifts collection full of new exciting products, as well as budget-friendly tips, hands-on ideas and extensive printing options.

## Product

### Responsible sourcing and production

All products are produced in a responsible way and comply with the requirements under European laws and regulations. Choosing more sustainable materials has been an essential factor during the development of this new collection.

## People

### Social responsibility

During production and printing we focus on creating a safe and positive working environment. All items are well-constructed, tested and produced with compliant and safe materials.

## Planet

### Sustainable solutions and sustainable printing

By strongly reducing the use of virgin plastic and rethinking the most efficient way to pack the goods, both individually and for onward distribution shipment, we can reduce waste and influence our environmental footprint. Our printing process requires the safe use of all production inputs, such as chemicals and the control of all production outputs and emissions.

## The meaning of More than Gifts >

# tritan™ RENEW

FROM EASTMAN

Tritan™ Renew is powered by revolutionary recycling technology that transforms single-use plastic waste into durable materials, offsetting the use of fossil fuels and lowering greenhouse gas emissions.

### Environmental care

Enabled through a unique process that breaks down waste plastic into its basic chemical building blocks, allowing plastic materials to be recycled again and again.

### Clear and clean

Superior glass-like quality and unsurpassed transparency. Odor and taste resistant.

### Durability

Made with innovative sustainable materials that are strong impact resistant, Tritan™ Renew is highly durable, dishwasher safe... made to last.

### BPA free

Tritan™ Renew are free of BPA, BPS, and BPF chemicals thanks to Eastman's innovative recycling technologies, suitable for contact with food.

# Printing Techniques

Having your logo printed with the widest range of printing techniques has never been so easy. These are the main techniques used to print your logo.

## Digital printing 360

Compared to round screen, it's possible to print full colour images. UV ink technology does not emit volatile organic compounds to the atmosphere. When combined with white underprint - possibilities are limitless on transparent objects.

## Laser engraving 360

Next level for inkless decoration, now possible on cylindrical products. Compared to conventional engraving, area is limited by circumference of cylindrical object. Can be used on mugs with handles. Best results on natural materials.

## Sublimation

Printed with special inks on transfer paper, transferred to material using high temperatures. Photographic quality of printed images, vivid colours and accuracy of small details. Requires white background and polyester material/coating.

## Doming

Digitally printed full colour label on self-adhesive polymer foil, covered by a thick layer of transparent epoxy resin, which both protects the image, as well as giving a premium, glossy look and finish.

## Digital Label

A flexible way to brand various products in almost any shape, self-adhesive polymer foil will fit in positions not accessible by other print techniques.

## Digital Printing

UV flat bed inkjet technology allows you to print vivid full colour images on various materials - artificial and natural. Compared to Digital printing 360 - technique requires flat, rigid products. White underprint possible.

## Digital inlay

Xerographic full colour print on paper is a perfect way to convey message to Your customer. This technique is best for text and images, can be used: as a manual or "Thank You" notes or items where this is the only option available.

## Button printing

Best way to stand out from the crowd with this full colour button. Printed using xerographic technology on paper, assembled with glossy finish to give premium look.

### Digital Transfer

Digitally printed image on carrier foil with heat activated glue, applied in high temperature and pressure. Features full colour photographic quality and sharp details. Gives a premium look and feel, especially on textile materials.

### Screen transfer

Conventional way of indirect printing using screen print. Can be applied on materials and places, where direct screen printing is not possible, in addition up to 8 different colours can be used on one image. Special colours available.

### Ceramic transfer

Technique of printing image using special inks on paper, transferred to the item using water film and heated in extreme temperatures to assure durability. Special colours available. Recommended for ceramic materials.

### Screen printing

Image exposed on a screen mesh, through which ink is squeezed to the marked surface. Main advantage is large printing area on flat surfaces, almost any material, with possibility to use special colours. First choice for textiles.

### Pad printing

Image transferred to surface from engraved cliché by silicone tampon. Most versatile marking technique on almost any rigid shape and material. Maximum of 4 colours. Special colours available. Cost efficient technique on small items.

### Round screen printing

Evolution of screen printing allowing print on to cylindrical and conical products. Compared to pad printing, technique allows for a bigger printing area. Can be used on mugs with handles. Maximum of 1 colour. Special colours available.

### Debossing

The engraved metal stamp is heated and is pressed against the material creating a permanent depression in the shape of the customer's artwork. Best results can be achieved on leather, PU, cardboard materials, like notebooks, organizers.

### Embroidery

Computerized stitching allows complex artworks being sewn in the material, creating premium and permanent marking. Maximum of 8 colours in one image. Possible on textile materials like bags, t-shirts, jackets, etc, as well as caps.

### Laser engraving

Marking is permanent, by selectively removing microscopic layers of material, thus creating visible marks on the surface. Colour varies depending on processed material. Best results on natural materials (metals, wood, bamboo, etc.).
